

Global Emergency & Critical Care Symposium

Roadmap to Regionalisation: Pathways for Embedding the WHO Emergency, Critical and Operative (ECO) Care Strategy Across the Asia-Pacific

This September, the Global Emergency & Critical Care Conference will bring together clinicians, development professionals and policymakers for two days of learning, discussion and collaboration. We'll explore how to better connect services and improve patient outcomes across the acute care continuum.

The Global Emergency & Critical Care Symposium will feature three sessions exploring the World Health Organization's Global Strategy for Integrated ECO Care:

- The policymaker's perspective: strategic guidance for regional ECO strengthening
- Beyond the EC(h)O chamber: multi-disciplinary perspectives on integrated clinical care
- Pacific priorities: perspectives from frontline emergency and critical care clinicians

Whether you're a frontline clinician, health system leader, or policymaker, this is your opportunity to engage with peers, exchange ideas, and drive meaningful change in emergency and critical care.

Rick Brennan

Emergency and public health physician, Previous Regional Emergency Director, World Health Organization

Carita Davis

Assistant Secretary, Indo-Pacific Centre for Health Security, Department of Foreign Affairs and Trade (DFAT)

Matthew Earl

Registered Paramedic, Clinical Manager for ProMedical Vanuatu

Silina Motofaga

Team Leader, Clinical Services Programme, The Pacific Community (SPC)
